Paper #1.

IMPORTANT!! See course policies and my Blueprint for Writing a Paper for further requirements on the paper. These are not merely suggestions for how to write a good paper. (Links to both the course policies and the Blueprint can be found on the course website.)

You have the choice of writing on one of the following essay topics:

1. Is the Replacement Thesis true or false? Use Almeder and Churchland if you write this essay.
2. We have seen three accounts of justification: foundationalism, coherentism, and externalism. Defend one of these positions. Use Pollock & Cruz and at least one of the cognitive scientists we have discussed in defending your position.
   a. Note: Do not try an extensive comparison of the three views. This won't be feasible given the length of the paper.
3. Is the Doxastic Assumption true or false? If it's false, then should we favor Pollock and Cruz's non-doxastic internalism or an externalist position? Use Pollock & Cruz and at least one of the cognitive scientists we have discussed in defending your position.
